URL: <http://venkataoec.wixsite.com/roadsafety-coe>

We would refer you to our case study and problem-solving Road Safety SCM Centre, once we understand more of your requirement

URL: TBD will be shared after needs analysis and preview

**Registration Desk**

As this is a follow-up communication and not a real-time event, we welcome you to our programme by sensitizing you to the accountability we pro-actively expect.

A highlight of the same follows later in the document.

## **NSSR Road Safety Statement of Accountability**

### **Accountability as part of duty**

Co-achieving National objective programmes or projects is more often a duty that is part of government organizations, departments, business associations and added producer/consumer elements open to associate for the programme or project. With this in mind, it needs to be said, today as our sense of purpose and understanding of duty can vary, we need to add.....

Accountability as part of duty due to social, management and political influences that may accelerate or deter the commitment, confidence, courage and determination to work where influences such as

- ☐ Role and responsibilities to do one's duty
- ☐ Laws that may not be abided to
- ☐ Anti-quality issues
- ☐ Unregulated staging of work causing more time and costs
- ☐ Unevaluated risk new/expected and also ones that are not mitigated
- ☐ Investment and Management cycles, value propositions and issues
- ☐ Gaps in involvement to address the need or issue
- ☐ Seniority dependent relativity for accountability as part of duty, where all these elements are a cause for variance in the duty performed

To address these influences, we feel that we can precondition ourselves by wearing a **badge along with any identity card**, that says "I am accountable for my work and duty towards road safety and our interrelated and due-regard to use of roads for business, professional involvement, personal needs and supply chaining". This role and responsibility undertaking could initiate the commitment in the solution finding.

The **print-simply identity card** for you/your team/department/business could simply include a name and connected work responsibility/programme/project. This could be the apt solution for teams or people co-achieving for National objective programmes or projects.

The NSSR Road Safety programme is one example of this.

### **NSSR Road Safety material and resources**

AOEC has developed a Centre of Excellence to strategically help this interest, work and sense of duty.

Collaborate with us via <https://venkataoec.wixsite.com/roadsafety-coe>

**Business specific link:** for case study and solution finding will be developed on further needs analysis and review
